

# 2020

## Welcome to the 40<sup>th</sup> annual Building Safety Month, celebrated during the month of May

Building Safety Month is an international celebration of all aspects of building safety that helps families, employers and leaders understand and appreciate the best practices that keep the places where we live, work and play safe.

The ongoing support of Building Safety Month and the important role code officials play in public safety in the built environment has come from U.S. presidents, governors, mayors, county executives, other government officials and construction industry professionals.

Building and fire departments are at the front line of building safety, and understand the importance of the adoption of modern, regularly updated building codes more than anyone. Join us and share the messages created by the Division of Fire Prevention & Control and the International Code Council with your local communities.

Please look forward to the week one and two information, and share with your community.
